

OUR COMMUNITY NEEDS SUPERHEROES.

We are seeking 1,000 heroes willing exercise their superpower of generosity to donate \$1,000 dollars for the purchase of a new powerful MRI machine for our community hospital, Ashford Hospital.

Ashford Hospital is a non profit 501c3 institution founded 119 years ago to serve the community with excellent health care services with care and compassion. So, you can save your life, the life of someone you love, and use your superpower to improve the health of our community. As an added value, if you make your contribution before December 31, 2023, your contribution will be 100% tax deductible.

Do good, get good.

An MRI machine can save your life. MRI is a non-invasive, radiation-free, sophisticated technology used to investigate your body's anatomy and physiology for disease detection, diagnosis, and treatment monitoring.

A new MRI will benefit our patients by:

- | | |
|---|---|
| <ul style="list-style-type: none">① Creating a higher-quality image. The new scanner captures greater detail and resolution. Doctors will be able to see smaller details with greater clarity and thus diagnose, monitor, and treat conditions earlier and more accurately. | <ul style="list-style-type: none">① Producing an image up to 2 times faster than before. Scan times will be reduced and technologists will be able to complete more scans per hour and accommodate more patients during a year. |
| <ul style="list-style-type: none">① Providing a more comfortable patient experience. The MRI scanner is more open and spacious. If small spaces make you nervous, this new design will lessen that feeling. So will the fact that the new technology is quieter! | <ul style="list-style-type: none">① Performing MRI-guided breast biopsies. The current MRI is not capable of performing these procedures. |
| <ul style="list-style-type: none">① Reducing the risk of breakdown/repair. This ensures reliable patient treatment. | <ul style="list-style-type: none">① Helping diagnose: The more powerful magnet can better diagnose and stage cancers of the prostate, rectum, ovaries, pancreas, liver, and kidneys |

It's no exaggeration to say that every single contribution you make – big or small – will have an impact and can save your life or the life of someone you love.
